

STOCK CONTAINERS

The Stock Containers from AW Engineering have a high specification and the same high quality build as all AW Trailers.

They feature an aluminium framework clad with high grade thick aluminium plate and incorporate a fully welded aluminium tread plate floor.

The AW stock container is available in 22ft and 26ft long models as standard. Its intended to be used in conjunction with a AW bale trailer.

We can make the stock container to any length required and it can be manufactured to suit any existing trailer. Please do not hesitate to contact us to discuss your requirements.
